Hong Kong International Airport Reports Steady Traffic Growth in First Half of 2015

Hong Kong International Airport (HKIA) recorded steady growth in all three traffic categories during the first half of 2015. From January to June this year, passenger throughput and flight movements rose by 9.1% and 4.4% to 33.6 million and 199,620 respectively, compared to the same period last year. Cargo traffic increased slightly by 0.6% to 2.1 million tonnes.

In the first half of 2015, passenger traffic was driven by continued growth of transfer/transit traffic and Hong Kong resident traffic, while cargo throughput was affected by a drop in exports. Passenger traffic and aircraft movements are expected to grow steadily in the second half, while cargo throughput is expected to consolidate for the rest of the year.

Mr. Henry Ma, General Manager, Market and Connectivity Development of Airport Authority Hong Kong said, "Our SkyPier ferry service has recently expanded to Lianhuashan in Guangzhou, which is now the ninth port served by HKIA. Starting from 1 July, two daily roundtrip ferry services between HKIA and Lianhuashan are provided for transfer passengers. The SkyPier ferry service extension can help meet rising demand for cross-boundary travel between our airport and the Pearl River Delta region, and further enhance HKIA's multi-modal connectivity for customers."

On a rolling 12-month basis, HKIA handled 66.1 million of passenger traffic and 4.4 million tonnes of cargo, up 7.1% and 3.2%, respectively, from the previous year. Flight movements also increased by 4.4% to 399,485.
